# DOTINUM

WE HELP COMAPNIES GROW

WE ARE A SOFTWARE HOUSE AND CREATIVE AGENCY FROM POLAND

For around 17 years Dotinum has been building various **WEBSITES** and **APPLICATIONS**

We also have been providing businesses with internet domains, hosting services on fast servers and SSL certificates.

Currently we are one of the biggest domain registrars in Poland.

GET TO KNOW US

WE FOCUS ON

- e-commerce development
- product configurators in e-commerce stores
- cloud infrastructure design and management
- Progressive Web Apps
- Android and iOS mobile apps
- UX driven design
- search engine optimization

WHAT WE DO?

DELIVER CUSTOM SOFTWARE SOLUTIONS

No more working with packaged software with hundreds of features, when you use only few of them and the one you really need is missing. We can create any software or web application that will help you reach your business goals.

DESIGN AND IMPLEMENT SERVER INFRASTRUCTURE

Buying infrastructure that will handle millions of visitors is simple if you have an unlimited budget. The challenge is to buy or rent infrastructure that will be easily scalable when needs grow. Should you go for cloud solutions or for a dedicated infrastructure? Which one will deliver better results and offer lower costs for your business? We would be happy to share our experience and help you find the best solution.

WEBSITE AND WEB APPLICATION SUPPORT

We hope you are looking not only for a reliable software house but also for a professional support provider. You can count on us whenever you need a quick support reaction or just a piece of advice.

MAKE YOUR WEBSITE MOBILE

If you are not reaching, engaging and monetizing customers on mobile devices, you are likely losing them to someone else. In many industries more and more traffic comes from mobile devices. We can make your existing website look great on smaller screens or create a dedicated - app for your product.

TECHNOLOGIES WE USE

PHP

The newest PHP provides both great flexibility and efficiency for many major websites and web applications. It can also handle big, multiserver applications with heavy traffic. We work on different frameworks, but most often with Laravel.

JAVASCRIPT

We have good knowledge of JavaScript, which is necessary to build fast responding and easy to use web applications. We use Angular, AngularJS, NodeJS, jQuery and others.

PROGRESSIVE WEB APPS

Progressive Web Apps are complex web applications that can successfully replace native and hybrid apps. PWA applications are designed by using HTML, CSS, JS. They will work on all systems (both iOS and Android).
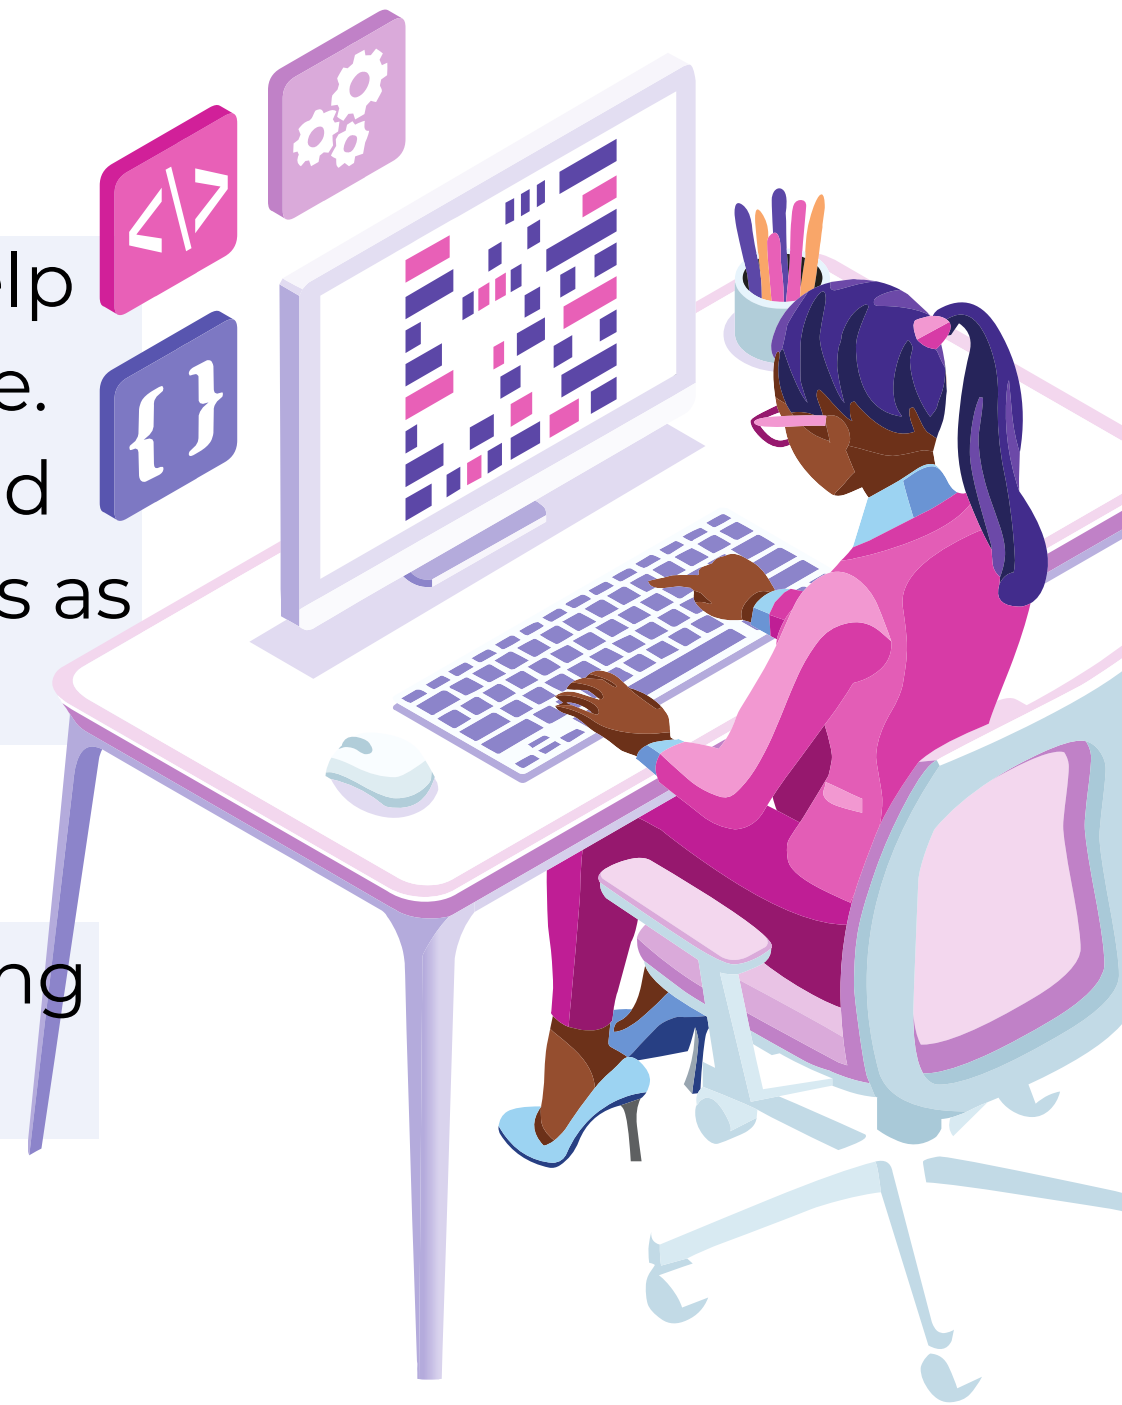

TOOLS WE USE

DATABASES

In our everyday work we mostly use MySQL. Looking for alternatives? No problem. We are also experienced in Percona, Oracle, MSSQL, MongoDB, Elasticsearch and SphinxSearch.

VERSION, TEST AND DEPLOY

Every project that we work on involves the use of various tools that help us collaborate with you when creating, testing and delivering software. This includes software versioning and revision control tools, automated testing tools, staging and production environment management tools as well as project management software.

LINUX

We also have been providing businesses with internet domains, hosting services on fast servers and SSL certificates.

TESTIMONIALS

CHECK OUT WHAT OUR CLIENTS ARE SAYING ABOUT US

MEDtube

"Throughout our long-term cooperation with Dotinum we have developed good communication standards and most importantly, we have built trust. Even in the face of difficult and conflict moments, Dotinum is a partner whose actions are guided by common sense and who strives for compromise. We recommend Dotinum as a reliable IT services provider and an honest business partner."

Wojciech Dolkowski, CEO

RoweryStylowe

"We have been working with Dotinum for over 5 years. During this time our business has grown to a completely different level, which allowed us to leave the competition behind. Dotinum stands out from the competition thanks to the speed of service, good communication and individual approach during every single task. I strongly recommend."

Maciej Myszko, CEO

Misiga

"I commissioned Dotinum to build a website that allows ordering wall murals, images, wall stickers and other products based on the size and design chosen by the customer. The results were great, to say the least. Their ideas ahead of my thoughts, full professionalism, promptness – rare qualities in IT companies. It's really worth it."
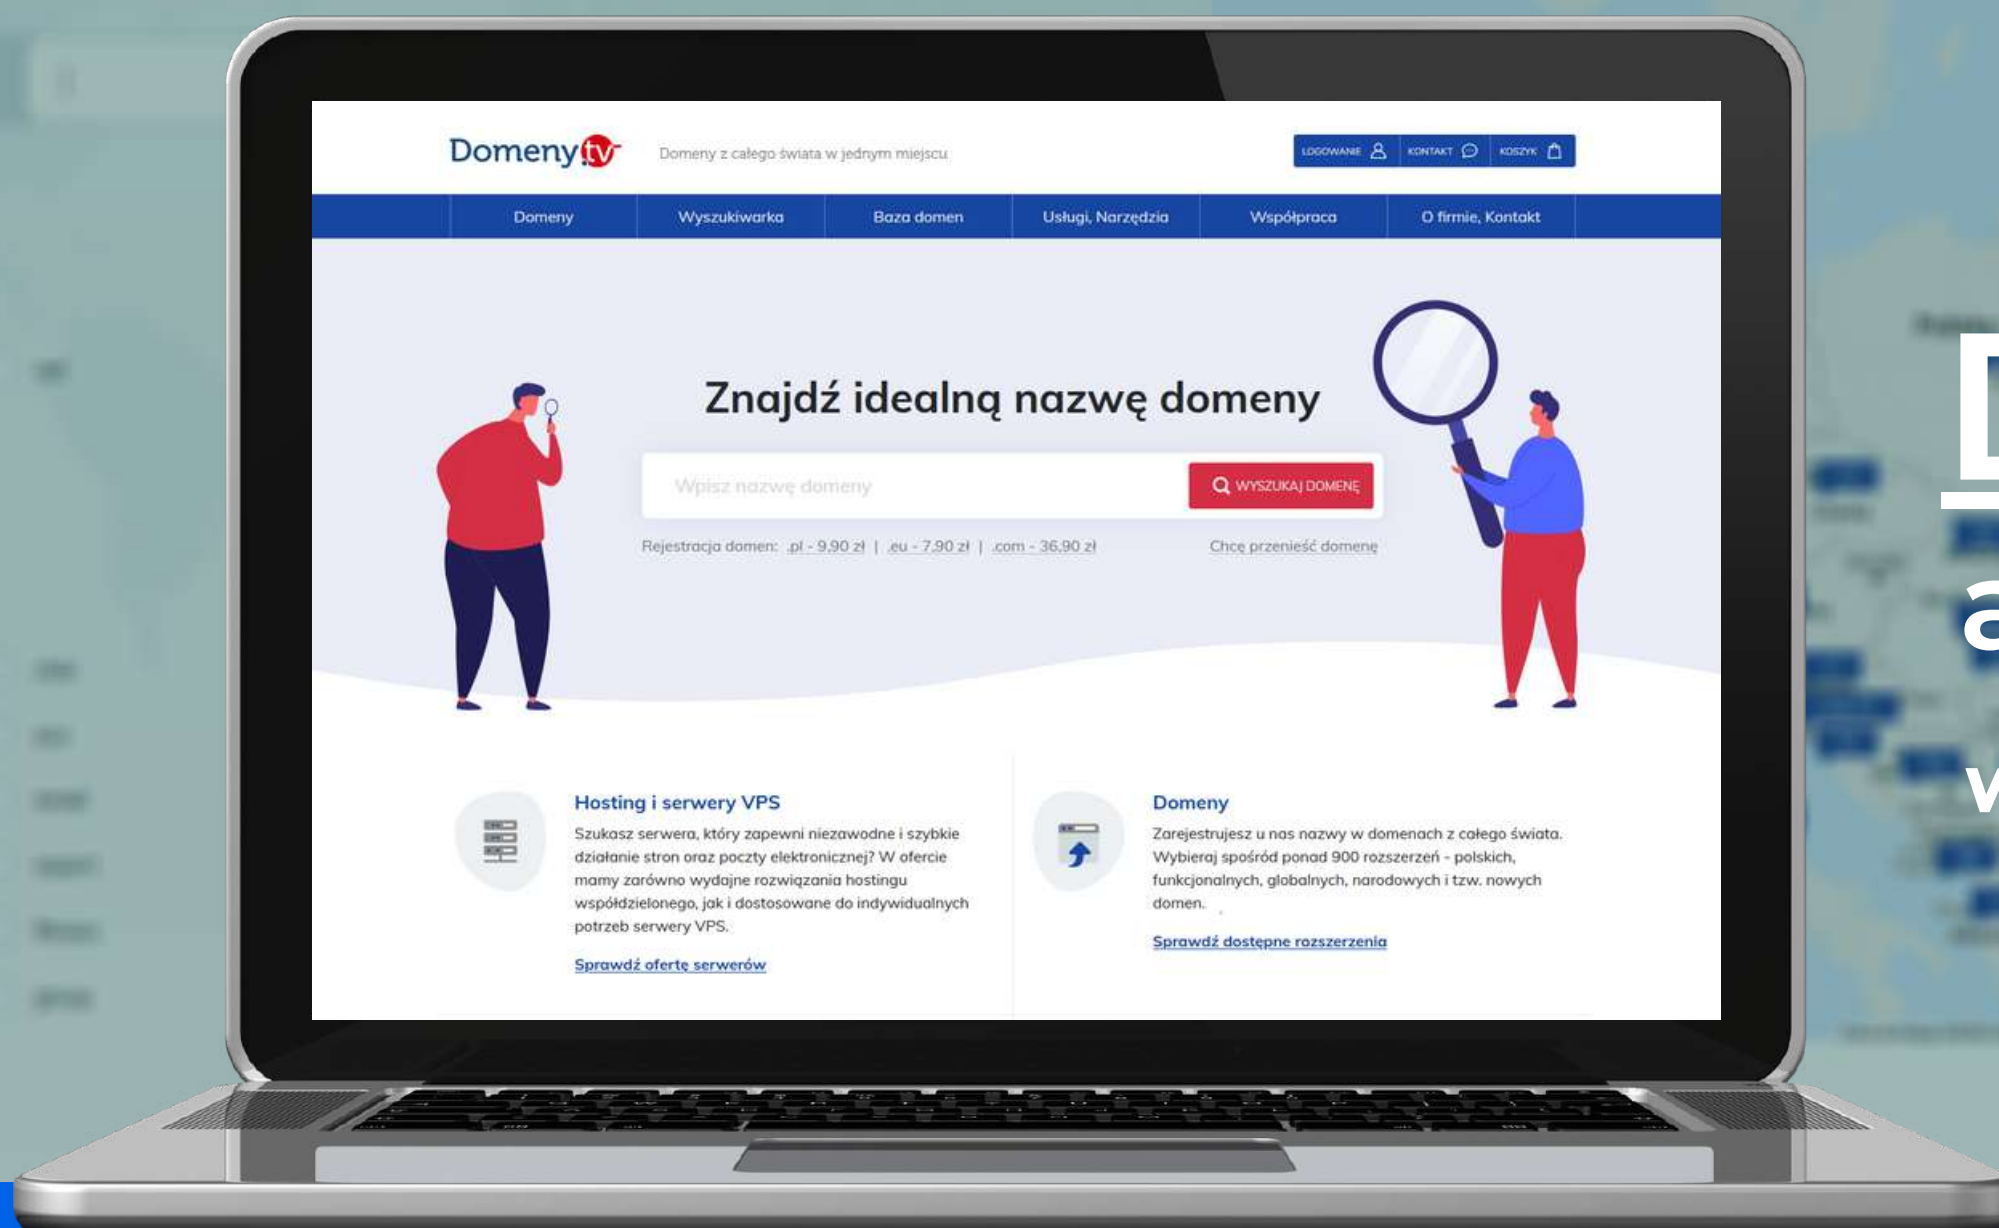

Artur Krysiak, CEO

PORTFOLIO

Click on image inside the laptop or on website adress to take a better look at our work.

Domeny.tv
and Domeny.tv App
www.domeny.tv/en

Our biggest project so far. Domain registration service, accredited registrar of .pl and .eu domains, largest offer of country-code domains in Poland. Integrates many external services and APIs to allow our customers to register and manage their domains instantly, 24/7. Used by thousands of customers, mostly from Poland. Many advanced tools for professional domainers and large portfolio holders.

Domeny.tv is available in two language versions: Polish and English.

PlasticExpress.pl

www.plasticexpress.pl

PlasticExpress.pl is another online store prepared and implemented on our proprietary platform. An online store offers the possibility of individual designing plexiglass cut elements. The interactive configurator is a unique element.

PlasticExpress.pl is available in three language versions: Polish, French and German.

DobraZima

www.dobrazima.pl

Dobrazima is an online store offering a wide range of winter equipment and accessories. This project belongs to RoweryStylowe.pl - one of the largest bicycle stores in Poland, which has leading Dutch brands in their offer. Dedicated store software allows our client to manage all products and orders in one place, regardless of which sales channel they come from. Built-in integration with the warehouse store system and partner wholesalers ensures always the current store offer.

Rowerystylowe.pl

www.rowerystylowe.pl

RoweryStylowe.pl is a popular bike shop in Poland, that specializes in new Dutch bicycles, parts and accessories. Dedicated internet store software allows to display detailed product descriptions, to check product availability real-time from warehouses of a few different suppliers in the Netherlands. It also enables to easily deploy clone stores on separate domains, dedicated to one type of bike or one manufacturer. The store allows payment using various methods, integrates shipping using diverse courier and mail companies.

MEDtube
## and MEDtube mobile App

www.medtube.pl

MEDtube is an online video-centric education and communication platform for healthcare professionals worldwide. Built using Kohana framework, first version released in 2010, with many advanced features. Regularly maintained, 24/7 support. Uses multiserver cloud infrastructure, designed and serviced by us. Mobile apps for Android and iOS allow users to access MEDtube library anytime at their convenience.

Moon Cosmetics

www.mooncosmetics.co.uk/en

Large online store with Polish cosmetics operating in the UK market. Tailored project prepared for a customer who used only eBay as a store platform before. Fully responsive web design, including purchase process.

Stół plus krzesła

www.stolpluskrzesla.pl

Online store with wooden tables and chairs. Dozens of options to choose from. On top of that, we created a 3D configurator. Thanks to that, customers can create their ideal piece of furniture.
